AUSTRALIA GROWS FAR MORE FOOD THAN IT CAN POSSIBLY **EAT**

From paddock to plate: what Australia grows, ships, eats and uses

teal — more/better
ochre — less/worse
dark grey — wheat
violet — canola
grey — no data

01. Grow: tonnes of wheat	02. Move: % exported	03. Eat: % of household short of food	04. Sustain: % of water to farms

① GROW: how much and how reliably?

⇒ occupancy matrix

② MOVE: where does it all go?

million tonnes of

⇒ thousand tonnes

XX%

$XX.X

③ EAT: what ends up on the plate?

⇒ waffle chart (faceted)

XX.X%

④ SUSTAIN %: what does it cost

rainfall

water used

wheat harvested

rainfall

rise in price

⑤ Conclusion
